Statement of Reasons for Allowance

1. The present claims are allowable over the "closest" prior art Abusleme et al. (U.S. 5,498,680) for the following reasons:

Abusleme et al. disclose a process of synthesizing chlorotrifluoroethylene homopolymer or copolymer with additional fluorinated monomers wherein the process is conducted in the presence of microemulsion and alkali metal persulfate initiator at temperature of 10-150 °C and pressure of 15-40 bar.

The present claims have been amended to recite microemulsion "consisting of" water, (per)fluoropolyoxyalkylene, and fluorinated surfactant. The recitation of "consisting of" with respect to the microemulsion limits the microemulsion from containing any other ingredients besides those explicitly recited in the claim, namely, water, (per)fluoropolyoxyalkylene, and fluorinated surfactant of the formula $R_f-X^+M^-$.

However, Abusleme et al. disclose microemulsion which requires as an essential ingredient fluoropolyoxyalkylene which would fall outside the scope of the "consisting of" claim language of the present claims. Thus, Abusleme et al. is no longer a relevant reference against the present claims.

Further, applicants' amendment overcomes the 35 USC 112 rejection of record.

In light of the above, it is clear that the rejections of record are untenable and so, the present claims are passed to issue.
